- HydroEUgen
- National Committee of Bulgaria for the World Energy Council

* *Joining the Alliance, NGOs would agree to engage and contribute to the deployment of renewable hydrogen in terms of supply, demand and distribution as NGOs promote the rapid phase out of the use and production of all fossil fuels in order to reach the objectives of the Paris Agreement and thus do not consider fossil fuel based hydrogen as a short - or long-term solution. And to target the use of renewable hydrogen specifically to those sectors and industrial processes which are hard to decarbonise (steel, cement and basic chemicals, aviation, shipping and heavy good vehicles).*
